

API Documentation

1. Introduction

This document defines the REST APIs used by the Expense Tracker application.

Frontend

React Native (TypeScript)

Backend

Django REST Framework (DRF)

Database

PostgreSQL (Planned)

Authentication

JWT (JSON Web Token)

Base URL

Development

<http://localhost:8000/api/>

Production

<https://your-domain.com/api/>

2. Authentication APIs

Login

Endpoint

POST

</api/login/>

Description

Authenticate an existing user.

Request

```
{  
  "email": "user@email.com",
```

```
"password":"123456"
}
```

Response

```
{
  "access":"jwt_access_token",
  "refresh":"jwt_refresh_token",
  "user":{
    "id":1,
    "name":"Muhammad Haseeb",
    "email":"user@email.com"
  }
}
```

Status Codes

200 Success

400 Validation Error

401 Invalid Credentials

Register

POST

/api/register/

Request

```
{
  "name":"Muhammad Haseeb",
  "email":"user@email.com",
  "password":"123456"
}
```

Response

```
{  
  "message":"Account created successfully."  
}
```

Forgot Password

POST

/api/forgot-password/

Request

```
{  
  "email":"user@email.com"  
}
```

Response

```
{  
  "message":"Password reset email sent."  
}
```

3. User APIs

Get Profile

GET

/api/profile/

Response

```
{  
  "id":1,  
  "name":"Muhammad Haseeb",  
  "email":"user@email.com",
```

```
"profile_image":"..."
}
```

Update Profile

PUT

/api/profile/

Request

```
{
  "name":"Muhammad Haseeb"
}
```

Response

```
{
  "message":"Profile updated."
}
```

4. Income APIs

Get Income List

GET

/api/income/

Add Income

POST

/api/income/

Request

```
{
  "title":"Salary",
```

```
"amount":3500,
"category":"Job",
"date":"2026-07-30"
}
Response
{
  "message":"Income added successfully."
}
```

Update Income

PUT

/api/income/{id}/

Delete Income

DELETE

/api/income/{id}/

5. Expense APIs

Get Expense List

GET

/api/expense/

Add Expense

POST

/api/expense/

Request

```
{  
  "title":"Netflix",  
  "amount":13,  
  "category":"Entertainment",  
  "date":"2026-07-30"  
}
```

Update Expense

PUT

/api/expense/{id}/

Delete Expense

DELETE

/api/expense/{id}/

6. Transaction APIs

Get All Transactions

GET

/api/transactions/

Response

```
[  
  {  
    "id":1,  
    "title":"Netflix",  
    "amount":13,
```

```
    "type":"expense"
  }
]
```

Get Transaction Details

GET

/api/transactions/{id}/

7. Statistics APIs

Monthly Statistics

GET

/api/statistics/month/

Response

```
{
  "income":15000,
  "expense":2549,
  "categories":[]
}
```

Weekly Statistics

GET

/api/statistics/week/

Yearly Statistics

GET

/api/statistics/year/

8. Wallet APIs

Wallet Balance

GET

/api/wallet/

Connect Card

POST

/api/wallet/connect-card/

Connect Bank

POST

/api/wallet/connect-bank/

Upcoming Bills

GET

/api/wallet/bills/

Pay Bill

POST

/api/wallet/pay/

9. Notifications

GET

/api/notifications/

10. Search

GET

/api/search/

11. HTTP Status Codes

200 OK

201 Created

204 Deleted

400 Bad Request

401 Unauthorized

403 Forbidden

404 Not Found

500 Internal Server Error

12. Authentication

Authorization

Bearer <access_token>

Example

Authorization:

Bearer eyJhbGc....

13. API Naming Convention

GET	Retrieve Data
POST	Create Data
PUT	Update Data
DELETE	Delete Data

14. Future APIs

Export PDF

Export Excel

Currency Exchange

Cloud Backup

AI Spending Analysis

Budget Prediction

Recurring Transactions

Document Information

Version : 1.0

Author : Muhammad Haseeb

Backend : Django REST Framework

Status : Planning

Last Updated : 06 August 2026
