Connect Wallet

9. Connect Wallet

The image shows a mobile application interface for connecting a wallet. At the top, a dark green header contains a back arrow, the title "Connect Wallet", and a bell icon. Below the header, there are two tabs: "Cards" (active) and "Accounts". The main content area displays a virtual debit card with the following details: "Debit Card" and "Mono" at the top; a green card icon; the card number "6219 8610 2888 8075"; the cardholder's name "CARD HOLDER IRVAN MOSES"; and the expiry date "EXPIRY 22/01". Below the card, the section "Add your debit Card" includes a note: "This card must be connected to a bank account under your name." and a form with five input fields: "Name on Card", "Debit Card" (with a card icon), "CVC", "Expiration MM/" (with a calendar icon), and "ZIP". The bottom of the screen features a standard Android navigation bar with back, home, and app drawer icons.

Change Profile

12. Edit Profile Screen

Purpose

Allows the user to modify personal and account information.

Fields

- Full Name
- Email
- Phone Number
- Username
- Country
- Currency

Additional UI

- Profile image
- Camera button
- Back button
- Save Changes button

Current behavior

- User can edit the fields locally using React Native state.
- Pressing Save Changes calls `navigation.goBack()` and returns to Profile.
- No backend persistence has been implemented yet.
